PROFESSIONAL SUMMARY

B.Tech CSE student graduating in 2028 (GPA 8.0/10), focused on backend/product engineering and applied AI. Built full-stack applications using Java, Python, TypeScript, Node.js/Express, Flask, PostgreSQL, and LLM APIs, with experience in REST APIs, authentication/RBAC, data-processing workflows, and document intelligence.

PROFESSIONAL EXPERIENCE

Web Developer Intern | Youth Talks *Jul–Nov 2026*

- Developed the BICCI FAF 2026 website and contributed to Workmint, focusing on responsive UI implementation and consistent user flows.
- Collaborated on website and platform updates, translating requirements into maintainable frontend changes and validating key interactions.

Web Developer Intern | Abhinav Immigration Pvt. Ltd. *Jul–Sep 2026*

- Developed a lead-generation tool, reception-desk workflow, and eligibility checker to support internal operations and user-facing enquiry flows.
- Improved form interactions and interface usability; coordinated requirements and tested key workflows for reliable day-to-day use.

AI/ML Intern | Cognevance Technologies *May–Jun 2026*

- Worked on supervised and unsupervised ML workflows, including data preprocessing, feature engineering, and model evaluation.
- Supported integration of AI components into application systems, with attention to output quality and reliability.

AI Intern | Codec Technologies *May–Jun 2026*

- Contributed AI-powered modules for client-facing applications, including NLP/LLM integration and prompt engineering.
- Worked on data-extraction workflows and reviewed output quality to improve usefulness of AI-assisted features.

Freelance Web Developer | Self-employed *2025–Present*

- Build and maintain responsive websites for client and personal projects, covering frontend implementation, domain setup, deployment, and post-launch updates.
- Use React/Next.js, TypeScript, JavaScript, and modern web tooling to translate requirements into usable interfaces; optimize assets and document handoffs where applicable.

SELECTED PROJECTS

FinTech Doc Intelligence | *React, Next.js, TypeScript, LLM API*

- Built an LLM-backed extraction pipeline to convert unstructured financial documents into structured fields; achieved 90%+ parsing accuracy.
- Integrated the document workflow with a React/Next.js interface and TypeScript frontend.

OmniAssist AI | *Flask, Supabase, PostgreSQL, OpenAI API*

- Built Flask APIs with JWT authentication and persistent multi-session conversations backed by Supabase/PostgreSQL.
- Integrated OpenAI-based reasoning through modular services; supports 50+ concurrent users.

Tw33t | *Next.js, TypeScript, Node.js, PostgreSQL*

- Built a full-stack social platform with a real-time feed, REST APIs, and PostgreSQL persistence using Next.js, TypeScript, and Node.js.

AI Task Manager | *React, Next.js, OpenAI API*

- Built a full-stack task manager with a modular architecture and LLM-driven task prioritization.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL
Backend & APIs: Node.js, Express.js, Flask, REST APIs, API design, JWT authentication, authorization, RBAC
Frontend: React.js, Next.js
Databases & Data: PostgreSQL, MySQL, MongoDB, Supabase, schema design, query optimization
Applied AI: LLM APIs, RAG, NLP, prompt engineering, intelligent document processing, AI pipelines
CS & Tools: DSA, OOP, DBMS, OS, Computer Networks, System Design, Git, GitHub, Linux, CI/CD

EDUCATION

B.Tech, Computer Science & Engineering | NIET, Greater Noida (AKTU) | GPA: 8.0/10 *2024–2028*

Class XII: Divine Public School, CBSE | 77.8%
Class X: Divine Public School, CBSE | 85%

LEADERSHIP & ACHIEVEMENTS

Founder & President, Coders Era Community (2024–Present): grew the community to 5,000+ members, delivered 10+ workshops, hosted and organized technical events at Microsoft offices, and mentored/judged 5+ hackathon submissions.
Community: Member of the HackBriven community.
Problem Solving: 150+ LeetCode problems solved.

CERTIFICATIONS & BADGES

- Intel AI Aware Badge — Foundational AI concepts and responsible AI awareness.
- Microsoft — Introduction to Large Language Models — Introductory concepts behind LLMs and their applications.
- Microsoft MSAI Genius Badge — AI learning and skills recognition badge.
- GitHub — Introduction to Prompt Engineering with GitHub Copilot — Prompting techniques for AI-assisted coding workflows.
- Deloitte Technology Job Simulation — Virtual experience in technology-focused problem-solving and professional tasks.
